เนื้อหา

Timmy's family are miners. They live on a rectangular mine the size of $m \times n$. On his 13th birthday, Timmy's parents give him his first stick of dynamite! This dynamite explodes in a 3×3 area. Moreover, his family has a map of the mine with numbers in each square that shows the amount of minerals there. Where should Timmy put the dynamite to gain the most minerals?

Input:

Line 1: M N ($M, N > 3$)

next M lines: $M \times N$ 2D array

Output:

Line 1: Amount of minerals

Line 2 $\rightarrow$ ($A + 1$): The area of explosion

TESTCASE

input	output
4 4 7 6 5 4 8 9 0 6 4 2 3 8 8 3 4 8	44 7 6 5 8 9 0 4 2 3
